Professional Summary

DevOps and Cloud Engineering professional with extensive experience in designing, automating, and optimizing infrastructure and deployment pipelines. Proven expertise in cloud-native solutions, Infrastructure as Code, and system reliability engineering. Adept at driving efficiency, security, and scalability across diverse environments.

Experience

DevOps

Mar 2022 – Present

ActZero, Ontario, Canada (Remote)

- Engineered and optimized **CI/CD pipelines** using **Terraform** and **GCP Cloud Build**, reducing deployment times and enhancing software delivery efficiency across multiple environments.
- Architected cloud-native **Infrastructure as Code (IaC)** solutions with **Terraform** for **GCP**, including secure **VPC design**, hybrid cloud connectivity, and firewall rules.
- Designed and implemented **Kubernetes** infrastructure with auto-scaling capabilities using **GKE (Google Kubernetes Engine)** and **Horizontal Pod Autoscaler (HPA)**, optimizing resource allocation.
- Developed comprehensive monitoring, logging, and alerting systems using **Google Cloud Operations Suite (formerly Stackdriver)**, enabling proactive incident detection, improving system health tracking, and enhancing issue resolution.
- Created modular **Terraform** components and automated on-premises to **cloud migrations**, facilitating efficient resource management and standardized practices.

Cloud Support Engineer / IT Support Analyst

Jan 2019 – Feb 2022

IntelliGO Networks, Toronto, Canada

- Managed and ingested enterprise data using **GCS (Google Cloud Storage)** and **Pub/Sub**, supporting data orchestration needs for scalable operations.
- Engineered continuous deployment workflows using **GCP Cloud Build** and **GitLab CI**, improving deployment efficiency and reducing manual effort by 50%, leading to quicker feature rollouts.
- Documented **GCP architecture**, incident playbooks, and CI/CD pipelines through comprehensive knowledge sharing.
- Automated **GCP infrastructure deployments** for data pipelines using **Composer (Airflow)** and **Terraform**, streamlining provisioning and reducing setup time.
- Created **Python** scripts for metadata management, data lineage, and log transformations to enhance data pipeline reliability.

System Administrator

Sept 2014 – Nov 2018

Andela, Abuja, Nigeria

- Implemented robust **HIPAA** and **PII data protection measures**, including least-privilege access controls and encryption strategies, enhancing compliance and security frameworks.
- Engineered data streaming and analysis solutions using **Google Pub/Sub** and **BigQuery**, facilitating high-performance data analytics.
- Built **ETL workflows** with **GCP Dataflow**, preparing data for analytics applications such as data modeling and reporting for business intelligence consumption.
- Managed hybrid cloud connectivity with a focus on **GCP hybrid networking solutions**, including **VPC configurations**, DNS, and IAM security models.

IT Technical Support

Oct 2011 – Aug 2014

The Nigerian Stock Exchange, Lagos, Nigeria

- Optimized server and network infrastructure by preconfiguring **Windows servers**, **Cisco switches**, and **Active Directory**.
- Integrated **GCP-based cloud solutions** for enhanced data handling and logging, enabling real-time insights and improved system scalability.
- Supported comprehensive IT infrastructure management and technical support operations, ensuring high availability during critical financial operations.

Education

Business Analytics
Bachelor of Science in Computer Science

Cambrian College of Science, Sudbury, Ontario
University of Port-Harcourt, Rivers, Nigeria

Certifications

- **Certified Kubernetes Administrator (CKA)**
- **Red Hat Certified Systems Administrator (RHCSA)**
- **AWS Certified Solutions Architect**

Skills

- **Cloud:** AWS, Azure, GCP
- **IaC / Automation:** Terraform, Ansible, GitLab, Github Actions, Jenkins, Packer, Helm
- **Programming:** Python, PHP, SQL, Golang
- **Monitoring / Logging:** ELK, Grafana, Loki, OpenTelemetry, Jaeger
- **Containers / Orchestration:** Docker, Kubernetes, ArgoCD, Flux, Velero, Istio
- **Other Tools:** Git, Kafka, GraphQL, Artifactory, SonarQube, Trivy
